

# IMMUNITY INSTITUTE

February 10<sup>th</sup> 2021

**COPY**

Rt. Hon. Matt Hancock MP  
Secretary of State for Health and Social Care  
Department of Health & Social Care  
39 Victoria St, Westminster  
London SW1H 0EU

Dear Mr Hancock –

**Report:**

**SARS-CoV-2 and VARIANTS**

**The Need For A Combined Approach - Natural Immunity & Vitamin D, plus Vaccines**

We, the Trustees of the Immunity Institute (ImmunityInstitute.org), are pleased to submit our accompanying Report to you, entitled as above.

We believe its recommendations provide a clear exit route out of the SARS-CoV-2 pandemic with supporting rationale and relevant references. You will note, also, that the report's recommendations have been endorsed by organisations representing over ten thousand practising UK doctors.

In summary, we propose a Public Health initiative to optimise natural immunity in the UK population by eliminating vitamin D deficiency, combined with the current vaccine program.

The authors are confident that such a combined programme will have the effect of:

- ◆ rapidly reducing the susceptibility of the population to SARS-CoV-2 and variants;
- ◆ rapidly reducing the number of those hospitalised, the severity of their disease and mortality;
- ◆ reducing the length of COVID-19 hospital stays;
- ◆ allowing the economy to return to 'normal'; and
- ◆ removing the risk of imposing repeated future winter lockdowns

We will be very happy to meet with you, in person or by videoconference, to expand on the proposals and address any queries you may have. Dr David Grimes, retired Consultant Physician, Blackburn Hospitals Trust and Dr David Anderson, retired Professor of Medicine, Manchester University and the Chinese University of Hong Kong, both of whom have been working with Vitamin D deficiency and supplementation for many years, will also be delighted to provide specific policy input, as will medical colleagues in the Vitamin D Campaign Group.

We look forward to hearing from you.

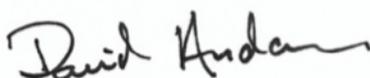

Yours sincerely –

Dr David S Grimes MD FRCP.
